

## ***The Importance of the CMIA & Biomed Departments Vendor Contest***

The CMIA and California Hospital Biomed Departments have been the catalyst for the success of OMED of Nevada, LLC.

OMED was organized around the idea of working with the California Hospital Biomedical Departments to refurbish, re-market and redeploy used medical electronic equipment. The idea was to keep the equipment out of landfills and more importantly to pass on desperately needed equipment to other health care organizations, both domestically and abroad.

The Green Initiative was at the fore-front of this OMED concept and the CMIA was the avenue to approach the biomedes to help meet their and our goals. Sharing rewards of this venture with the CMIA was always part of the plan. Developing scholarships and funding CMIA chapter operations with funds resulting from the sale of used equipment has proved to be a sound and mutually fulfilling relationship.

As OMED of Nevada, LLC has grown and taken on new partners, the relationship with the CMIA continues to be a focal point of operations. Our employees are participating in the operation and management of the CMIA at the chapter and State Board levels. We will continue to support the CMIA and work closely with California hospitals in furthering the cause.

See the article from "24 X 7" magazine published in 2004 which further details the message.
